

Rehabilitation and Home Nursing

Emirates Rehabilitation and Homecare provides dedicated, patient-centered care in the UAE & Oman. When a person needs medical care; they are vulnerable, often dependent and at the very least – are in need of assistance.

Personal experiences of how our bodies react (as we age) are helpful while providing insight & knowledge that is both useful and practical for recovery.

Let us help you provide the care you need.

Emirates Rehabilitation and Homecare strives to achieve the best quality of life for every patient.

Healthcare professionals at Emirates Rehabilitation and Homecare recognize that routine activities (most of us take for granted) may be new and unique experiences for our patients.

Furthermore, many of our patients are anxious about what will happen to them in the future.

While caring for patients, our team understands that their passion and commitment can make a difference in someone's life.

Addressing medical issues from a patient's perspective is a critical element of Emirates Rehabilitation and Homecare recovery programs.

An informed, confident patient with functional potential capacity will recover faster.

By providing accurate information on diagnosis, treatment and progress; it is just as vital that we show patients how they can facilitate and speed up their recovery.

Let us help you provide the care you need.
